MPSG 2200/2250
Direct Replacement for Space-Gard 201

MPSG 2400
Direct Replacement for Space-Gard 401

High Efficiency Replacement Filters: Up to 99%

With over 500,000 Space-Gard® filter systems installed throughout the United States, contractors and consumers alike are looking for cost savings options for their filter replacements. Purolator Air Filtration introduced the MPSG series air filters to satisfy this demand and now offers a **new and improved STRING-LESS** MPSG 2200/2250 and MPSG 2400. This improved product uses special **GlueBead** technology to streamline installation, making it easier and faster than ever! The economical MPSG series fits Space-Gard® housings and is the perfect replacement product because it is easy to use and fits the existing housing without any special adaptations.

Service technicians like using MPSG Series because the collapsible media used in the filter enables them to fit a week's worth of replacement filters in their vehicle.

* The high-efficiency media used in both MPSG models is designed to last six months or longer, with recommended checks every 90 days. For particles **5 microns and larger**, filter efficiency reaches **99%**. for particles as small as **1 micron**, the filter still reaches **95% effectiveness**.

- MPSG series meets or exceeds original product specifications
- Increases longevity of HVAC Systems when properly used and maintained
- Improves efficiency of HVAC Systems when properly used and maintained
- Increases Filtration Efficiency
- Designed for home and light commercial use for removal of 99% of particles 5 microns and larger
- Improves Air Quality in the home or commercial application

* Space-Gard® is a registered trademark of Research Products Corporation. The name is used here merely to identify the types of products compatible with this filter.
